Day
Automation

Day Automation is a leading provider of unified security systems, building automation, instructional technology, network infrastructure and energy services. Their innovative solutions provide secure, comfortable, connected and sustainable environments for their clients.

Founded in 1976, the company has grown to be one of the premier security and building automation solution providers in New York State. They bring smart, reliable solutions to provide a safe and secure environment for all of their clients.

Day Automation provides services that impact over a half million students in over 320 school districts, colleges and universities. They also provide solutions to industrial, commercial and institutional clients, including hospitals, libraries, and government offices, helping to control the cost of energy and facility operations. Their systems are installed in 1500+ buildings across New York State.
