# “ ECASB BUSINESS CONNECTIONS”

Day Automation is a leading provider of unified security systems, building automation, instructional technology, network infrastructure and energy services. Their innovative solutions provide secure, comfortable, connected and sustainable environments for their clients.

Founded in 1976, the company has grown to be one of the premier security and building automation solution providers in New York State. They deliver smart and reliable solutions to provide a safe and secure environment for their clients.

Day Automation provides services that impact over a half million students in over 320 school districts, colleges and universities. They also provide solutions to industrial, commercial and institutional clients, including hospitals, libraries, and government offices, helping control the cost of energy and facility operations. Their systems are installed in 1500+ buildings across New York State.

Over 180 of the industry’s top specialists in security solutions, building automation, and energy services make up the Day Automation team. Their providers are highly skilled in their discipline and they take great pride in providing innovation and service with the utmost integrity.

## Education Partnerships

Day Automation offers Steam Education Support and Programs, including District Events such as Engineer in the classroom and teacher professional development conversations and connection series, making
